

# How to Tell Military Time Using a Military Time Chart

## Problems getting the hang of military time?

A lot of jobs these days have crazy work schedules ,shift work and contential shifts so a lot of companies and businesses revolve around the 24 hour time clock. The military time clock in Canada ,United states,Australia ,Philippines and the united kingdom are all the same so there should not be much confusion. A military time chart is an easy way for us to tell and understand military time. A military time chart or as they use to call it ( Army time Chart) is just an easier way for us to convert standard time to military time.

0:00 = 12:00 AM	12:00 = 12:00 PM
1:00 = 1:00 AM	13:00 = 1:00 PM
2:00 = 2:00 AM	14:00 = 2:00 PM
3:00 = 3:00 AM	15:00 = 3:00 PM
4:00 = 4:00 AM	16:00 = 4:00 PM
5:00 = 5:00 AM	17:00 = 5:00 PM
6:00 = 6:00 AM	18:00 = 6:00 PM
7:00 = 7:00 AM	19:00 = 7:00 PM
8:00 = 8:00 AM	20:00 = 8:00 PM
9:00 = 9:00 AM	21:00 = 9:00 PM
10:00 = 10:00 AM	22:00 = 10:00 PM
11:00 = 11:00 AM	23:00 = 11:00 PM

This is just your standard military time but these charts can get a little bit more tricky especially when you get into the military minutes chart converting minutes into decimals this can be useful for somebody doing payroll time conversion

CONVERTING MINUTES TO DECIMALS  
**EQUIVALENT TIME CHART                      HOURS**
